Kubota launches new 44hp FC4-441, expanding the front centre-collect mower lineup

Kubota is excited to announce the latest addition to its front centre-collect mower range, the new 44hp FC4-441 model.

Picture: FC4-441 Prototype

The Kubota front centre-collect series has been a part of Kubota's portfolio for over a year now, making significant strides in the industry as a professional mower and tool carrier.

Powered by a brand new Kubota 4-cylinder, 44hp/32kw V1505-CR-TE5 diesel engine, the FC4-441 is Stage V compliant with DPF emission control. Similar to the larger FC4-501 model, it features two-speed ranges capable of reaching speeds of up to 20km/h, permanent 4WD, and a 1300-litre collector, making it ideal for high-performance tasks. The machine is equipped with the preferred hydrostatic transmission (HST), with one motor on the front axle and one on the rear, ensuring smooth and reliable operation.

The operating station of the FC4-441 differs from other machines in the range; a new steering column design has been added to create a wide and open platform for additional leg space, enhancing the operator's comfort. The machine comes standard with an air suspension seat and an ergonomic side control console.

In terms of mowing options, the FC4-441 offers two versatile choices: a 59in/150cm rotary mower deck or a 3-in-1 collecting flail deck, providing a solution for various grounds and turf maintenance tasks. Additionally, it is also possible to equip other implements like vacuum hose or even a snow blade. This model complements the existing Front Collect range, catering to different price points and specifications that the current lineup doesn't offer.

With its versatility and wide range of applications, from local authorities to turf management and grounds maintenance, the FC4-441 is poised to meet the diverse needs of Kubota's customers.

The new Kubota FC4-441 will be available in dealerships as early as Quarter 1 2025.

About Kubota

Kubota has been a leading manufacturer of agricultural equipment, construction equipment, lawn mowers and Industrial Engines since 1890. With its global Headquarters in Osaka Japan, offices in more than 120 countries, and more than 55,000 employees in North America, Europe and Asia, Kubota had a turnover of \$21.4 billion in 2023. Although machinery equipment is its main products line, Kubota also produces a wide range of products such as city water purification systems, irrigation systems, piping systems, roof and home construction, and large underground valves.

Our Mission

Our Brand Statement, "For Earth, For Life," speaks to our commitment to the conservation of the environment while aiding the production of food and water supplies, which are vital to meet the needs of our society, as the world's population continues to grow. This mission is accomplished every time a Kubota tractor harvests the land to produce food or when our construction equipment excavates to transport water or provide shelter.
